Profile

AI Solutions Architect, Agentic AI Engineer, and Digital Transformation Leader with 25+ years of experience building production-grade digital platforms, automation systems, and compliance-sensitive technology programs. Combines deep full-stack engineering, UX/product strategy, civic technology, and modern LLM orchestration to design AI workflows that reduce production cycles, improve operational decision-making, and scale high-quality digital output. Known for translating ambiguous business problems into working AI-enabled systems across OpenAI, Claude, n8n, JavaScript, React, TypeScript, APIs, CMS platforms, and human-in-the-loop QA environments. Career highlights include building an award-winning municipal broadcast platform, launching AI-enabled civic media systems with 60%+ average viewer retention, and reducing creative production turnaround by 3-5x through autonomous workflow design.

Professional Experience

Lead Consultant - AI Product, Automation & Digital Strategy, Creative Minds Studios, Fort Lauderdale, FL

Nov 2024

Lead AI product strategy, agentic workflow architecture, and digital transformation consulting for civic-information, operations, and content-driven organizations. Architect production AI workflows using OpenAI APIs, Anthropic Claude, n8n, JavaScript automation, prompt-chain design, multi-step reasoning flows, structured outputs, and human-in-the-loop QA. Built proprietary LLM-powered content operations pipeline spanning ideation, script generation, editing, visual production, voiceover coordination, CMS publishing, SEO metadata, internal linking, and compliance-grade review. Reduced creative and publishing turnaround by 3-5x through reusable automation templates, AI-assisted production systems, and integrated approval checkpoints. Founded Civic Central, an AI-enabled civic video platform that achieved 60%+ average viewer retention and top-decile engagement for non-sensationalized public-interest content. Designed AI SupportOps, an autonomous support workflow for intake triage, priority classification, contextual response drafting, escalation routing, and approval-based outbound communication. Developed ShipGuard AI, an LLM-driven operations decision-support workflow that structures risk signals, recommends shipping-protection actions, and preserves human oversight for final decisions. Built automated blogging and video-production workflows integrating content strategy, prompt systems, brand voice controls, publishing calendars, SEO, analytics, and multi-channel distribution.

Webmaster & Digital Infrastructure Specialist, City of Tamarac, Tamarac, FL

Jul 2023 to Nov 2024

Served as the city's primary digital authority for public-facing websites, municipal web properties, live broadcast systems, digital signage, and mission-critical communications infrastructure. Designed, built, and deployed TamaracTV, a citywide live broadcast platform and multi-site digital display network recognized with the 2024 Excellence in Innovation Award. Partnered directly with the CIO from concept through production while coordinating requirements across elected officials, department heads, vendors, communications staff, IT, and public-facing stakeholders. Maintained and improved municipal digital platforms under accessibility, procurement, public-records, cybersecurity, and compliance expectations. Translated complex civic communication needs into scalable web, video, and display systems supporting residents, employees, public meetings, and emergency-style information flows.

Senior UI/UX Designer & Developer, All Clear Decisioning, Remote / Contract

Nov 2022 to Jul 2023

Designed and developed a production chatbot decisioning module from wireframes through implementation using React, TypeScript, Bootstrap 5, responsive UI architecture, and API-connected workflows. Created regulated fintech user experiences for decisioning, support, and customer interaction flows with FINRA-adjacent compliance considerations. Translated business rules and user paths into intuitive interface states, component systems, and front-end logic for complex decision workflows.

UI/UX Designer & Developer, Life Extension Buyers Club, Fort Lauderdale, FL

Jul 2019 to Oct 2022

Owned front-end product surfaces for a high-traffic, multi-million-user e-commerce platform built on a Sitecore enterprise stack. Led A/B testing initiatives with growth, merchandising, analytics, and creative teams to improve conversion, engagement, product discovery, and customer experience. Built responsive UI components, campaign landing pages, digital merchandising experiences, and content-driven commerce workflows. Collaborated across marketing, development, compliance, and product teams to improve usability across health, wellness, subscription, and e-commerce customer journeys.

Front-End Developer & Brand Systems Lead, Investacorp, Miami, FL

Nov 2010 to Apr 2014

Led the UI/UX overhaul of Investalink.com, an advisor-facing digital platform in a FINRA-regulated broker/dealer environment. Built front-end interfaces, brand systems, advisor-facing tools, and digital communication assets supporting financial advisor workflows and compliance review. Partnered with internal stakeholders to modernize web presentation, user experience, and digital brand consistency across financial-services properties.

Strategic Creative & Web Partner, Infinite Source Communications, Remote

Jan 2010

Provided long-term strategic, creative, technical, and web support for government-contracting and federal-audience campaigns across digital communications, brand systems, campaign sites, and content production. Supported web, creative, and strategic deliverables for public-sector and contractor-facing initiatives requiring high trust, clear messaging, and durable execution. Recognized with Hall of Fame induction in 2025 for 16 years of sustained partnership, technical contribution, and creative impact.
